Simmons describes this curtain wall as a hybrid, one that combines characteristics of a window wall where individual panels have no structural dependency on adjacent panels. "The

## Acces PDF Ce 479 Curtain Wall Structures Book

fact is, hybrids are becoming much more common because they can achieve certain architectural intentions that could not be achieved by traditional aluminum unitized curtain walls," he explains.

Curtainwall framing is designed to extend out from a building through connection clips and/or welded connections. While curtainwall studs do not typically carry vertical loads from the structure itself, they are considered load-bearing as they must be engineered to carry the load of the exterior finish of a structure combined
