Then several years ago, I had a bit of a color epiphany, brought on by a giant corally-pink wall that we installed in a garden we use for a trade show. While I love the color, we used a paint color match system to duplicate the color of my winter coat. I wasn't so sure a 15 foot tall, 100 foot long, wall painted that color was the best idea.

The element of form is defined as the shape of a plant and the structure of its branching pattern. For a picture illustrating form, see Page 1. Trees come in many shapes (especially if pruned), including columnar and globular shapes. Likewise, tree forms range structurally from having the stiffly upright branches of Lombardy poplar trees to the droopy quality of a weeping willow.

Designing a Garden With Landscape Design Principles
