You can search Google Books for any book or topic. In this case, let's go with "Alice in Wonderland" since it's a well-known book, and there's probably a free eBook or two for this title. The original work is in the public domain, so most of the variations are just with formatting and the number of illustrations included in the work. However, you might also run into several copies for sale, as reformatting the print copy into an eBook still took some work. Some of your search results may also be related works with the same title.

NYSEARCH Range™ Plus Interchangeability Model (Range of Acceptability for Natural Gas Equipment) Description: Growth in shale and bio-derived gas supplies is broadening the range of natural gas compositions being distributed in North America. Furthermore, blending of hydrogen with natural gas may emerge as a strategy for optimizing the use of renewable energy.

Gas interchange in fluidized beds is characterized using two-fluid model simulations. For an isolated bubble, the simulations reproduce the potential flow theory. For bubbling regime, the potential flow underpredicts the simulated gas interchange. A novel model for 2D bubbles is proposed for bubbling regime.
