home through the roof,
walls, and windows.

Heat-reflecting roofs,
insulation, and energy
efficient windows will
help to reduce that
heat conduction.

Radiation is heat
traveling in the form of
visible and non-visible
light. Sunlight is an
obvious source of heat
for homes.

extend comfort and temperature control where the main HVAC doesn't go. This technology also works for detached buildings, such as for she shed heating and cooling.

One major plus to ductless heating and cooling is that these systems do not require ductwork - a big bonus when space is limited, as is the case in she shed design. If your she shed is a
