Plate Tectonic Notes • Earth's Layers: • Crust • Mantle • Core Crust (lithosphere) Plate Movement The crust is broken into plates that move. - Lithosphere is divided into plates that slide around on top of the slowly moving mesosphere (tectonic plates) - It occurred after the break-up of Pangaea, and since then the continents

### Plate Tectonic Notes

Plate tectonics states that the Earth's crust and upper mantle are broken into sections, called plates. These plates move around the mantle. Plates are composed of the crust and a part of the upper mantle, these two parts together are called the lithosphere. The layer below the lithosphere is the asthenosphere.
