The second line looks for the Python compiled version of the previous migration files and delete them. Dropping the database. The next step would be deleting the actual database depending on the used database system. For Sqlite, you just need to delete the sqlite file which exists in your current folder and has an extension of .sqlite3

Picture 11 of 20It takes a few secs for Grammarly to refine your file. That way, I really did not have to await it to refine my text numerous times. Image 13 of 20I had Grammarly inspect pupil work in addition to a sentence mistake test paper I developed to see exactly how lots of types of errors it can capture. It exceeded other grammar checkers.

...

Our brains are doing our best to help us out, but they can be real assholes sometimes. Sometimes it seems like your own brain is out to get you—melting down in the middle of the grocery store, picking fights with your date, getting you addicted to something, or shutting down completely at the worst possible moments. You already told your brain firmly that it isn't good to do these things
